Good morning, Mike and Dave,

I hope you had a good meeting yesterday with Dan and Rochelle. At your request, I am sending the Biological Evaluation and transmittal letters for the Hells Canyon Temperature SSC. The EPA sent the Biological Evaluation to NMFS and USFWS on 4/4/19 to initiate ESA consultation for the revised Idaho water quality standard for temperature for the Snake River below the Hells Canyon Dam to its confluence with the Salmon River.

Also attached is the approval letter and Technical Support Document for the Idaho Human Health Criteria.

Please do not hesitate to contact me if you have any questions or would like additional information.
